**Table 1: Import Aggregate Base Data Evaluation,
Parcel G, Hunters Point Naval Shipyard**

Notes:

1 These values are based on the RGs cited in the Parcel G ROD (Navy, 2009). The project action limit is the RG value provided in the Parcel G ROD or the background concentration, whichever is higher.

CARB - California Air Resources Board

DL - detection limit

DLC - decision level concentration

EPA - U.S. Environmental Protection Agency

HPAL - Hunters Point Ambient Level

J - estimated

mg/kg - milligram per kilogram

pCi/g - picocurie per gram

RG - remedial goal

ROD - Record of Decision

RSL - regional screening level

U - not detected

VQ - validation qualifier
